DEMO PERMIT PROCESS FOR CONTRACTOR/OWNER

- ☐ Contact the Division of Air Quality at 801-536-4000.

- ☐ Contact Davis County Environmental Health at 801-451-3296.

- ☐ Complete a Farmington City Historic Preservation Commission "Remodel/Demolition Information Form" (with a minimum of 10 days notice before any demolition). This form and plans if necessary will be sent to the Historic Preservation Commission for review.

- ☐ Contact the utility companies and Blue Stakes:
  - Blue Stakes 532-5000
  - Farmington City Public Works 801-939-9282 (water must be disconnected from the main line)
  - Questar Gas: Ask-A-Tech 324-3287 or 1-800-323-5517 ext. 3287 (to request deactivation of gas)
  - Utah Power 1-881-221-7070
  - Any other utilities that may apply to the property

- ☐ Fill out a DEMOLITION PERMIT APPLICATION. The application will be processed after ALL approvals are submitted back to the City. The minimum fee is $55.55, if more than one inspection or other services are required, the permit cost will increase accordingly.

- ☐ Notify the Farmington Fire Department at 801-451-2842, of any demolitions so they can possibly have the opportunity to perform practice routines before the structure is torn down.

Asbestos: Renovation or Demolition?

What You Need to Know Before You Start

You are subject to State and/or Federal Regulations requiring inspection for asbestos.

Avoid Penalties $$$ and Delays: Have your project inspected for asbestos by a State Certified asbestos inspector *before* commencing work.

It is Illegal to Improperly Disturb Some Asbestos-Containing Materials

Asbestos can be found in these common building materials: Ceiling textures, vinyl floor coverings and mastic, boiler and pipe insulation, ceiling tile, roofing products, clapboard shingles, and many other building materials. Many of these materials are regulated; a certified asbestos inspector can determine which materials contain asbestos and which are regulated.

For All Renovation Projects

- Structures/components to be disturbed ***must be inspected for Asbestos***
- Buildings of *any* age may contain asbestos, even those newly built may have asbestos containing materials.
- Asbestos containing materials that are regulated or may become regulated ***must be removed by a certified asbestos removal contractor*** before they are disturbed by renovation activities.
- A **written notification** to Utah DAQ, payment of a notification fee and **two week waiting period** may be required before the removal of large amounts of regulated asbestos-containing materials.
- Regulated asbestos-containing waste material must be disposed of at an approved asbestos waste disposal site.

Demolitions, Destructive Salvage, House Moving

You are subject to State and/or federal regulations, even when there is NO asbestos.

Prior to Demolition

- Inspection: the building *must be inspected for asbestos* by a State certified asbestos inspector. Contact Utah DAQ for a current list of asbestos inspectors.
- Notification of Demolition form must be submitted to the Utah Division of Air Quality, even if no asbestos was found during the inspection.
- Asbestos removal (if necessary) must be performed by a Utah Certified Asbestos Contractor.
- Pay the Notification Fee (see our Web site for fee calculator).
- Wait two weeks. Demolition cannot proceed until two weeks from the postmark or hand delivery date of the notification of demolition.

Violation of asbestos regulations can result in monetary $$$ penalties and project delays.

Inspection Requirements

When a structure or facility is to be demolished or renovated, an inspection, conducted by a certified individual and company, is required. ***An asbestos survey report shall be generated, and available onsite to all persons who have access onsite.*** Furthermore, the asbestos survey must be maintained by the operator or owner one year after the completion of the project. The asbestos survey report shall contain the following information:

- brief description of area;
- list of all suspect materials identified in affected area; and,

- a statement of the asbestos content of each sample or materials assumed to contain asbestos.

Questions

Contact the Utah Division of Air Quality
Phone: 801-536-4000

For asbestos inspector and contractor lists, notification forms, and information about rules, or see our Web page.

Inspection Requirement

When a structure or facility is to be demolished or renovated, an inspection, conducted by a certified individual and company, is required (UAC R307-801-9). ***An asbestos inspection report must be generated, and available on-site to all persons who have access to the work site.*** Furthermore, the asbestos inspection report must be maintained by the operator or owner for one year after the completion of the project. The asbestos inspection report contains the following information:

1. a brief description of area;
2. a list of all suspect materials identified in affected area;
3. a list of samples collected from affected area;
4. a statement of the asbestos content of each sample or materials assumed to contain asbestos; and
5. a list of potential locations of suspect materials that were not accessible during initial inspection (UAC R307-801-10).

Questions?

Contact the
Utah Division of Air Quality
(801) 536-4000

For Utah Certified Asbestos Inspector and Contractor lists, notification forms, and information about Utah asbestos rules, see our web page:

www.airquality.utah.gov/haps/asbestos/index.htm

Renovation or Demolition?

What you need to know before you start

Utah Division of Air Quality

195 North 1950 West
PO Box 144820
Salt Lake City, Utah 84114-4820

Phone (801) 536-4000
Fax (801) 536-4099

Are you Remodeling or Renovating?

You are subject to Federal Regulations 40 CFR 61.145(a) and/or Utah Administrative Code (UAC) R307-801-9 requiring inspection for asbestos.

Avoid asbestos exposure by workers and building occupants, penalties and delays. Have your project inspected for asbestos by a State Certified asbestos inspector before commencing work.

It is illegal to improperly disturb asbestos-containing materials.

Asbestos can be found in these common building materials: ceiling textures, vinyl floor coverings and mastic, boiler and pipe insulation, ceiling tile, roofing products, asbestos-cement shingles, and many other building materials. Many of these materials can release harmful asbestos fibers and are regulated. A certified asbestos inspector can determine which materials contain asbestos and which are regulated.

For **ALL** Renovation Projects:

- Structures/components to be disturbed ***must be Inspected for Asbestos.***
- Buildings of ***any age*** may contain asbestos, even those newly built may have asbestos containing materials.
- Asbestos containing materials that are regulated or may become regulated ***must be removed by a certified asbestos abatement contractor*** before they are disturbed by renovation activities.
- A ***written notification*** to Utah DAQ, payment of a notification fee and ***10 working day waiting period*** may be required before the removal of large amounts of regulated asbestos-containing materials.
- Regulated asbestos-containing waste material ***must be disposed*** of at an approved asbestos waste disposal site.

Contact the Utah Division of Air Quality at: (801) 536-4000

www.airquality.utah.gov/haps/asbestos/

Demolitions, Destructive Salvage, House Moving

You are subject to Federal Regulations 40 CFR 61.145(a) and/or State Rules UAC R307-801-9 **even when there is NO asbestos found in the structure.**

Prior to Demolition:

- **Inspection:** the building ***must be inspected for asbestos*** by a state certified asbestos inspector. Contact Utah DAQ for a current list of Asbestos Inspectors.
- **Notification of Demolition** form must be submitted to the Utah Division of Air Quality, even if no asbestos was found during the inspection.
- **Asbestos Abatement** (if necessary) must be performed by a Utah Certified Asbestos Contractor.
- **Pay the Notification Fee** (see our website for the fee calculator).
- **Wait Ten Working Days.** Demolition cannot proceed until ten working days from the postmark or hand delivery date of the notification of demolition.

Violation of asbestos regulations can result in exposure to asbestos, monetary penalties and project delays.

Merrill Roberts, Building Inspector
Farmington City
P. O. Box 168
Farmington UT 84025-0160

Dear Mr. Roberts:

I would appreciate it if anytime there is a demolition scheduled in your jurisdiction that the property owner is notified that a pre-demolition inspection is required prior to the building removal. They need to contact me at Environmental Health. I am in the basement of the old county courthouse in Farmington, room #24. My telephone number is 451-3296.

The purpose of the inspection is to assure that hazardous materials in the structure are identified and then properly handled and disposed of as required by law. This would include mercury thermostats and lamps, PCB ballasts or transformers, refrigerator units containing chloro-floro-carbons, hazardous waste and asbestos containing materials.

Thanks for your help.

Sincerely,

Jerry Thompson

Jerry Thompson, M.P.H., E.H.S.,

August 22, 2003

Max Forbush
City Manager
Farmington City
130 N. Main
P.O. Box 160
Farmington City, UT 84025-0160

Dear Max,

Cities and counties are holding back on issuing demolition permits to contractors until the utility companies disconnect services and verify that conditions are safe. As a result, the number of costly accidents associated with digging into buried utility lines is down.

Various communities have adopted a policy to verify the status of buried utility lines at properties where demolition work will occur, before issuing a demolition permit. The results are impressive: improved safety; fewer service interruptions to citizens; and reduced expenses associated with repair work, lost product, property damage, construction delays, investigations and responding police and fire personnel.

Questar Gas would like to ask that you consider adopting a similar policy whereby demolition permits will not be issued until Questar Gas notifies your representative that natural gas service is shut off and secured. When Questar Gas receives a request for service termination related to property demolition, we will provide the contractor and your representative with confirmation that our facilities are shut off, prior to you issuing a demolition permit.

When you make the decision to implement this policy, and we hope you will, please have your designated representative call Questar Gas's Ask-A-Tech hotline so that we can obtain the correct contact information and your preferred method of notification. **(The number is 324-3237 or toll free 1-800-323-5517, extension 3287.)** Upon receipt of this contact information we will add you to our growing list of communities that have adopted this safety-minded *"verification before demolition"* policy. Subsequently, each time Questar Gas receives a request to terminate service for demolition in your community, we will contact your representative and verify that natural gas service is terminated and that it is safe to issue a demolition permit and for demolition work to begin.

Any effort to encourage contractors to notify Questar Gas of proposed demolition work, will help ensure the gas service is shut off in the road and eliminate service interruptions, unnecessary costs and the dangers of potential fire. Please remind all homeowners and contractors to call Blue Stakes before they dig and that Blue Stakes only locates and marks lines, it does not deactivate them.

You and your contractors are encouraged to call our Ask-A-Tech hotline to request deactivation of a gas line for property demolition work. The number is 324-3287 or toll free 1-800-323-5517, extension 3287.

If you have questions about demolition permits as they relate to buried utility lines, please contact our Ask-A-Tech hotline or call me at the number below. We appreciate your cooperation.

Sincerely,

Russell L. Kirlin
