If you want to make a carpool request you must follow the guide lines as follows or your request will not be honored.

Teams will be divided up in order of the following steps:

1. Coach volunteers may freeze 3-5 players depending on sport and age group. Coach volunteers **must** freeze but are not limited to his-her child(ren) and his/her assistant coach's child(ren). Parents of the frozen players must approve of a coach freezing their child.
2. Carpool Policy is as follows: In order for two people to play on the same team, person 1 must request person 2 and person 2 must request person 1. If requests do not match up they will not be honored. This information must be available at registration time. Please remember this is a request, staff will do all that they can to accommodate each request. The frozen players may not take advantage of the carpool policy.
3. The remaining players are put on teams by school if the volunteer and participant ratio corresponds. If it does not correspond teams will have a combination of players from multiple schools. (example: Windridge/Eagle Bay, Knowlton/Farmington, Farmington/Reading) Teams will be composed as even as possible with the same number of grades on each team.

For more information on team composition please visit our web site at farmington.utah.gov
