

About Private Lessons

If you would like your child to progress at their own speed private lessons might be the option for you!

Private lessons are a good way to advance your child in the skills that you want them to learn.

Unlike group lessons you do not have to wait for the other participant to catch on to a skill before the class moves on. Once your child has passed a skill they will move on to the next skill.

How it works: The first day you will talk with your instructor and let them know what skills you would like your child to learn or where you would like your child to be by the end of your swim lessons. Then your instructor will work with your child to get them to be at that point by the end of the lessons.
