April 11, 2019

FOR IMMEDIATE RELEASE

UDOT Region One Road Construction Report for April 12-18, 2019

Ogden-- The Utah Department of Transportation (UDOT) advises motorists of the following road construction and maintenance activities that may cause traffic impacts in the state's Northern Region.

Davis County

North Salt Lake
Apr 12-18: Crews continue work on the new Redwood Road Interchange bridge over I-215 in North Salt Lake. Motorists will encounter daily single lane closures on I-215 in both directions during non-peak hours through April, with intermittent daytime/nighttime single lane closures on Redwood Road leading up to the interchange. For more information on the I-215 Diverging Diamond Interchange, visit the project webpage at www.udot.utah.gov/ddinsl, email ddinsl@utah.gov, or call the project team at 800-292-3557.

Centerville
Apr 15: As early as Monday April 15, crews are scheduled to begin a concrete slab repair project on I-15 between Centerville and Farmington. However, the start date is subject to weather conditions. This project includes removal and replacement of broken concrete slabs, in addition to repair of damaged asphalt in the outside shoulder. Work will begin in the southbound lanes, with double lane closures from 9 p.m. to 5 a.m. Motorists are advised to reduce speeds in work zones and be watchful for workers and equipment in the closed lanes adjacent to traffic. No traffic impacts are anticipated during peak commute hours. For more information on this project, contact the project team at UDOTRegion1@utah.gov, or call 800-292-3557.

Farmington
Apr 12-13: On Friday night, April 12, crews will close the two right lanes southbound on US-89 in Farmington near the Shepard Lane interchange. The lane closures will begin at 10 p.m., and lanes should be open by 3 a.m.

Clearfield
Apr 12-18: Utility crews are conducting boring operations to relocate a gas line underneath the north-and southbound I-15 on-ramps at the 700 North (SR-193) Interchange. Utility crews are conducting boring operations on SR-193 from State Street to 1000 east. Northbound motorists should expect to see left lane closures from 7 a.m. to 8 p.m. Eastbound motorists should expect to see right lane closures from 7 a.m. to 8 p.m. Motorists should be alert for vehicles entering or exiting acting lanes of travel at any time. Call Dominion Energy at 801-201-8314, for further details.

Layton
Apr 12-18: Crews are beginning the preliminary work on the I-15 Davis Weber Express project, from Layton to Riverdale. Initial construction activities are expected to get underway as early as April 22, in the median from north of Antelope Drive to Riverdale Road. Once work begins on this project, motorists and local residents can expect day and night work seven days a week, with narrowed, shifted lanes on I-15. All lanes will be open during daytime hours, Monday through Friday. However, 11-foot lane width restrictions will be in place on I-15 during this project. Wide loads should contact UDOT’s Motor Carrier Division at 801-965-4892 for routing information. For more information about this project phone the project team at 833-415-9777, email i15express@utah.gov, or visit our website at www.udot.utah.gov/i15express.

Apr 12-18: While the major components of the US-89 widening and interchange construction are not yet scheduled, UDOT is coordinating with over 30 private and public utility companies to begin relocating lines that conflict with the future widening and frontage road system. Utility relocation work is anticipated to begin in late summer or early fall. To provide room for utility crews to safely perform this work, tree removal will begin on UDOT-owned properties in the next several weeks and continue into the summer. Coordination will take place directly with individuals leasing UDOT-managed properties prior to tree removal. Similarly, the salvage and demolition of vacant UDOT-owned properties in select areas is now underway. UDOT works with Habitat for Humanity to salvage useable materials prior to each demolition. UDOT also coordinates with local emergency responders to provide training opportunities in vacant buildings prior to demolition. Layton SWAT is planning a training in a UDOT-owned property on Eastside Drive near Oak Hills Drive the week of April 16. Area neighbors will be notified in advance of any training activities and demolition. For more information on the project or to sign up for email updates please call 888-752-8789 or email us at us89@utah.gov.

Weber County

Uintah
Apr 12-18: Construction is underway on a pavement preservation project on Interstate 84, from Riverdale Road (SR-26) to US-89. Crews are replacing sections of concrete pavement and replacing the asphalt shoulders. Work is expected to occur in the Uintah and South Weber area, as well as some work near Riverdale Road in Riverdale between 7 a.m. to 5 p.m. One lane will remain open in each direction as the newly poured concrete cures and work occurs. The project is expected to be completed by July 1. Stakeholders can call the project hotline at (801) 707-3662, email “i84work@utah.gov” or visit the project website at udot.utah.gov/go/i84work.

Ogden Canyon
Apr 12-18: Construction crews have begun pre-construction activities on the Ogden Canyon Bridge Rehabilitation and Replacement Project on State Route 39. Crews are mobilizing equipment to the site and conducting routine surveying and site preparation. Homes near bridgework are being inspected and videotaped prior to construction beginning. Until this process is complete, the start of project work is on hold. More information will be available soon. For more information about the project, visit udot.utah.gov/go/ogdencanyonbridges, contact the public involvement team at 801-509-5906, or email ogdencanyonbridges@utah.gov.

Farr West
Apr 12-18: Work is moving forward on a project to realign the I-15 2700 North Interchange and widen 2700 North (SR-134) from I-15 to US-89. Irrigation pipe installation continues between the I-15 northbound on-ramp and 1850 West. Crews are working in the shoulder on the north side of the road. Foundations for new signal poles are being placed at the intersection of 2000 West, on the west side of I-15. Lane or shoulder impacts are not expected as a part of this activity. Business access may be reduced in areas where more than one driveway exists, but at least one driveway will remain open at a time. For more information phone 801-699-5967 or 801-310-8110.

— more —
**Cache County**

**Logan**
Apr 12-18: Crews will be installing and activating new traffic and crosswalk signals at the Y-Intersection (SR-165 & US-89/91) in Logan early next week. During the changeover, motorists need to slow down and obey law enforcement officers at the intersection. The right turn from northbound US-89/91 to southbound SR-165 is temporarily closed until the project is finalized. Crews will continue to work in the center medians even after the signal is activated, so motorists should continue to expect shoulder closers and minor delays during the work. A neighboring Logan City sidewalk project is occurring in the same location, which may result in shoulder or lane impacts. Questions regarding the sidewalk project should be directed to Logan City Public Works. For more information about this project, contact the project team at (435) 213-2872, email udotregion1@utah.gov, or visit [www.udot.utah.gov/go/loganYintersection](http://www.udot.utah.gov/go/loganYintersection).

**Box Elder County**

**Snowville**
Apr 12-18: Crews are rehabilitating bridge decks on I-84 between Snowville and Howell through early summer. The project includes removal of existing asphalt, pothole repair and resurfacing of bridge decks. I-84 has been reduced to one lane in work zones, with work being completed on westbound I-84 bridges first, then switching to the eastbound bridges. Motorists are advised to reduce speeds in work zones and be watchful for workers and equipment in closed lanes adjacent to traffic. Wide loads in this work zone will be restricted to 11-feet in work zones. While work is underway on bridge structures at the Snowville and SR-30 interchanges, temporary traffic signals will be in place on the freeway overpasses. More information about this project is available online at [udot.utah.gov/go/i84bridges](http://udot.utah.gov/go/i84bridges) or by calling the project hotline at 435-213-2872 or emailing udotregion1@utah.gov.

---

Work may be rescheduled at any time due to inclement weather, supply issues or equipment availability. For up to date traffic information visit the UDOT Traffic website at [http://udottraffic.utah.gov](http://udottraffic.utah.gov); or download the free UDOT Traffic app for iPhones and Android Smartphones. You can be removed from this weekly release simply by responding to this week’s e-mail with “unsubscribe” in the subject line. Your request will be processed without delay.
